Pune, India | +91 8983840026 | mayureshkoli296@gmail.com | linkedin.com/in/mayureshkoli

WORK SUMMARY

- **Experienced Full stack Developer:** Over 3.5 years of experience in full-stack development, proficient in both front-end and back-end technologies. Proficient in developing dynamic, responsive web applications using modern frameworks and tools.
- **Comprehensive Development Expertise:** Expertise in developing scalable back-end services with NodeJS and integrating them with front-end technologies like ReactJS. Adept at building and maintaining interactive user interfaces and implementing efficient data handling solutions.
- **Cloud Integration and Optimization:** Managed cloud-based infrastructure and services, including implementing CI/CD pipelines and deploying applications on platforms like AWS(S3, EC2, Amplify). Optimized performance through advanced caching strategies and scalable architecture design.
- **Technical Proficiency and Tools:** Experienced in a wide range of technologies including JavaScript, TypeScript, SQL, MongoDB, Redis, and various front-end frameworks. Proficient in using tools like Git, Docker, Jenkins and AWS for effective development and deployment.

EXPERIENCE

CodeBlaze

Oct 2024 – Present

Backend Developer — ConnectedLife (Healthcare Project)

Pune, India

- Developed and maintained scalable NestJS microservices backend architecture for a healthcare platform tracking patients' daily activities, sleep, exercise, and vital signs.
- Designed secure, efficient APIs and ensured compliance with healthcare data privacy standards
- Designed and optimized APIs for efficient data handling, ensuring high availability and reliability in patient health monitoring.
- Collaborated closely with React Native (mobile) and Angular (web) teams to deliver seamless, cross-platform user experiences.
- Integrated wearable devices like Apple Watch, Fitbit, and Omron for automated data collection (steps, sleep, blood pressure) and real-time syncing.

JetSynthesys

May 2024 – Oct 2024

Software Development Engineer I

Pune, India

- Developed robust back-end systems for games using HTTPS APIs and WebSockets, ensuring seamless client-server and peer-to-peer communication.
- Implemented comprehensive features including one-to-one chat, group chat, matchmaking, rooms management, and data broadcasting to enhance in-game interactions and management.
- Created admin dashboards and data analytics tools, providing real-time insights and control to game administrators for improved operational efficiency and decision-making.

AA Gaming

Aug 2022 – Apr 2024

MERN Stack Developer

Pune, India

- Engineered administrative dashboards for user, content, and transaction management, enhancing operational efficiency by 20% through automation and intuitive UI improvements.
- Collaborated closely with graphics engine developers to implement interactive features, significantly boosting user engagement and activity.
- Continuously enhanced user authentication systems to adapt to evolving security threats, ensuring robust user data protection.

AA Gaming

Jan 2022 – Jul 2022

Web Development Intern

Pune, India

- Research and develop new statistical models to extract meaningful insights from game data, enhancing viewer experiences.
- Work closely with graphics engine developers to streamline integration and optimize data visualization during live streams.

SKILLS

Core Programming Languages: JavaScript, TypeScript
Secondary Programming Languages: C++, SQL
Frameworks: NestJS, NodeJS, Angular, ReactJS, NextJS
Frontend Technologies: Tailwind, Bootstrap, JQuery, AJAX, HTML, CSS
Databases: MongoDB, Redis, MySQL
CI/CD & DevOps: Git, Docker, Jenkins, AWS (EC2, S3)

EDUCATION

Bachelor of Engineering <i>Pune University CGPA 8.26/10</i>	Pune, MH <i>Aug. 2017 – July 2022</i>
---	--

PROJECTS

ConnectedLife – Healthcare Monitoring Platform (HealthTrackSG)	Oct 2024 – Present
---	--------------------

- **Role:** Mid-Senior Back-end Developer
- **Technologies Used:** NodeJS, NestJS, MongoDB, Redis, MySQL, Angular
- **Description:** Developed and maintained a scalable backend architecture using NestJS microservices for a healthcare platform focused on remote patient monitoring.
- **Achievements:**
 - **Feature-Rich Platform:** Enabled monitoring of patients’ daily activities, sleep, exercise, and vitals by integrating wearable devices like Apple Watch, Fitbit, and Omron. Ensured secure and efficient API design compliant with healthcare data privacy standards.
 - **Scalability Collaboration:** Delivered seamless cross-platform experiences by working closely with React Native (mobile) and Angular (web) teams, ensuring high availability, performance, and real-time data synchronization.
 - **Performance Optimization:** Introduced Redis for caching frequently accessed data and reducing database load, significantly improving API response time and system scalability.
 - **Data Reliability:** Enhanced patient data syncing workflows to ensure consistent and accurate tracking of vitals and activity logs across devices and time zones.

Jet-Play Back-end Environment	May 2024 – Oct 2024
--------------------------------------	---------------------

- **Role:** Mid-Senior Back-end Developer
- **Technologies Used:** Node.js, React, MongoDB, Redis, Unity
- **Description:** Developed back-end services for mobile and desktop games, including user data storage, real-time broadcasting, room management, and matchmaking, enhancing user experience and operational efficiency.
- **Achievements:**
 - **Enhanced Performance:** Optimized real-time data handling, resulting in a 30% increase in performance and reducing latency by 25%.
 - **Scalability:** Designed and implemented scalable architecture for handling up to 10,000 concurrent users, ensuring smooth game-play and minimal downtime.
 - **Data Integrity:** Improved data consistency and reliability by implementing advanced caching strategies with Redis, reducing data retrieval times by 40%.

- **Role:** Full-stack Developer
- **Technologies Used:** MERN Stack (MongoDB, Express.js, React, Node.js), AWS S3, AWS EC2, AWS Amplify
- **Description:** Engineered an e-sports platform with live tournament streaming, comprehensive player profile management, and efficient data handling for enhanced tournament experiences.
- **Achievements:**
 - **Increased User Engagement:** Enhanced user engagement by 40% through the implementation of interactive features and live streaming capabilities
 - **Efficient Data Handling:** Improved data management efficiency, leading to a 25% reduction in loading times for tournament data and player profiles.
 - **Scalable Architecture:** : Designed a scalable architecture that supported seamless handling of high traffic during peak tournament events.

PROFESSIONAL TRAINING

PG-DBDA

CDAC Grade B

Chennai, KA

Sept. 2022 – April 2023

SevenMentor Pvt. Ltd

Advanced Certification in MEAN Stack And React.js

Pune, India
